ineoPRINT

Convenient printing
from your mobile device

All the
convenience
and flexibility
of mobile printing

Nowadays, smartphones and tablets are part and parcel of business life. The downside is that printing from such mobile devices if often difficult or even impossible due to compatibility problems. This means employees have to return to their desk to print a document, which is both inconvenient and time-consuming. There is a clear demand for a flexible and convenient mobile printing solution – and that is exactly what ineoPRINT provides.

ineoPRINT, a free but feature-rich app from Develop, ideally supports a mobile work style.
With work life becoming more mobile and meetings regularly taking place away from people's desks, there is an increasing demand for more flexibility in printing or scanning documents. ineoPRINT gives all your employees and mobile workers a much greater degree of freedom in printing, scanning and managing their documents. Use ineoPRINT in your corporate environment and you'll enjoy all the convenience and flexibility of printing from an iOS or any Android device.

A feature-rich print app
ineoPRINT has a number of key features that make it the ideal mobile printing app for any modern-day corporate environment:

> **Printing**
Once installed on an iOS or Android mobile device, the ineoPRINT app enables documents to be printed on a wide variety of ineo multifunctional devices via WiFi, providing the app is connected to the same network as the ineo devices. The setup is perfectly simple (see next page for details) and no costs are involved.

> **Scanning**
Documents can be scanned from a wide variety of ineo systems to the ineoPRINT app installed on an iOS or Android mobile device – again via WiFi. The app also offers a preview function for scanned data.

> **Cloud connection**
ineoPRINT connects up to the main cloud storage providers, e.g. iCloud, Google Drive, Evernote, Office 365 and Dropbox.

> **Format support**
This app supports all common office file formats, e.g. MS Office, PDF, JPG, etc., as well as various finishing settings.

from smartphone/tablet**

**Download documents from Cloud
to smartphone/tablet**

Nothing could be simpler

ineoPRINT is perfectly easy to use and simple to connect up to an ineo device – manually by entering the device's IP address or DNS name, automatically by selecting the right device from a list of all devices in the network, or just as conveniently via the QR code scanning function for instant discovery of the most convenient ineo device.

How you benefit

• More flexible and individual work style
• Greater freedom in managing commonly used documents
• More convenience through printing from and scanning to cloud storage platforms
• Boost to productivity by freeing employees from the ties of workplace-bound printing
• Print-on-demand documents – any time and anywhere in an office building
